EDGE TECHNOLOGIES

A DIVISION OF HYDROMAT INC

COMPANY DESCRIPTION

Edge Technologies, a division of Hydromat Inc., is a leading productivity solutions provider to the precision metalworking industry. After 20 years as the bar feeder division of Hydromat, this group has a new name, a new vision and a new suite of products. Edge

Technologies' family of products specializes in bar feeding, parts cleaning systems and other lathe automation products.

Edge Technologies has extensive experience and a history of success and innovation demonstrated by 20 years providing bar feeder and lathe automation solutions, including more than 5,300 successful installations of magazine bar feeders in the North American marketplace.

PRODUCTS/SERVICES

Edge Technologies' product lines include sales and service in North America for the full line of FMB bar feeders, new Bartec Bar Feeding Solutions products and representation of Dürr Ecoclean's parts cleaning systems in the United States and Canada.

Designed and built in Germany, FMB bar feeders have the capacity to feed round, hex or square barstock from 2 mm to 100 mm in diameter and in lengths as long as 3,200 mm or 4,200 mm for single-spindle or Swiss and fixed headstock lathes as well as multi-spindles.

The Dürr Ecoclean systems include Hydrocarbon, Aqueous and new Polar technology using exclusive Dowclene fluids.
