Press Release – Brandon Wilson Promoted to Edge Technologies Sales and Service Engineer

St. Louis, MO – Brandon Wilson has been promoted from Regional Field Service Technician to Sales and Service Engineer, a brand-new role in Edge Technologies. He will be responsible for growing our Eastern Canadian Territory.

"I am thrilled to expand my skills here at Edge Technologies," Wilson said. "This role will provide me the opportunity to apply my strong technical skills and knowledge of production turning to solve customer problems from a sales engineering capacity."

Wilson brings over 20 years of experience in the machining and manufacturing industry: programming and tooling CNC machines at Midwest Instruments since September 2002, serving as a Production Operator

over Vehicle Assembly at Ford Motor Company, and then serving as a field service technician with Edge Technologies for the last 2 ½ years.

In his free time, Wilson spends time with his wife and daughter. He also enjoys hunting, fishing, and hot air ballooning.

About Edge Technologies

Edge Technologies is a solutions provider of CNC lathe automation with a focus on magazine bar feeding and unloading systems. The company's two-tiered lineup of models is by far the largest in the industry — supported by a North American field service network and large inventory of parts and accessories, including pusher and lathe collets. The company also offers coolant mist and oil mist filtration systems and workholding for all machine tools. Headquartered in St. Louis, MO, Edge Technologies is closing in on 40 years in the bar feeder business, an average employee tenure of 9.7 years, and over 19,000 successful installations. Edge is unmatched when it comes to industry knowledge and expertise in magazine bar feeding.
