Edge Technologies to Move into New Headquarters in Fall 2024

Maryland Heights, MO — Edge Technologies is excited to move to a new, modern facility located at 15703 Westport Commerce Drive, Maryland Heights, Mo., 63146.

Spanning 113,500 sq feet, this new space will support the company's continued growth by centralizing storage and distribution, and enhancing operational efficiency.

“This new facility represents a significant milestone for our company, allowing us to better serve our clients and streamline our operations,” said Kevin Meehan, President of Edge Technologies. “We are now equipped to handle future growth while maintaining the high standards our customers expect. Our team is excited about the opportunities this move brings, as it positions us for continued success for years to come.”

The facility is designed to maximize productivity:

<continued, next page>

<continued from pg. 1>

- 40,000 sq feet of production space, featuring a 20-ton crane with a 270-foot run linking the shop floor with the inside dock facility
- About 60,000 sq feet of dry storage space, with 40-foot ceilings to rack the product higher in a smaller footprint
- Modern office space encompassing 13,500 sq feet, including a collaborative floor plan, noise reduction features, and multiple meeting spaces

Overall, Edge Technologies will pick up about 67% additional floor space.

Located just 7.4 miles west (about a 10-minute drive) from Edge Technologies' current headquarters, the new facility will offer easy highway access.

The move is scheduled for November 2024, with full occupancy expected shortly thereafter.

About Edge Technologies

Edge Technologies is a solutions provider of CNC lathe automation with a focus on magazine bar feeding and unloading systems. The company's two-tiered lineup of models is by far the largest in the industry — supported by a North American field service network and large inventory of parts and accessories, including Schlenker pusher and lathe collets. The company also offers coolant mist and oil mist filtration systems for all machine tools. Headquartered in St. Louis, MO, Edge Technologies is closing in on 40 years in the bar feeder business, an average employee tenure of 7.7 years, and over 19,000 successful installations. Edge is unmatched when it comes to industry knowledge and expertise in magazine bar feeding.
